

Clink Clank

Sensory Bottle

You will need:

Non-transparent plastic bottle with lid (so that the sound is the main focus of the activity)

Lots of small metal items (screws, nuts, bolts etc.)

Strong glue

Tape (optional)

Method

- 1. Pour the metal items into the bottle. A nearly-full bottle will have more of a clinky metal sound.
- 2. Secure the lid with hot glue or superglue. You may also wish to tape around the lid for extra security.
- 3. As you shake and spin the bottle, listen to the metal clinking and clanking inside.
